Theme 1

The theme for this year's Abhikalpan is based on fractals. Geometrically, a fractal is a curve whose each part is capable of representing the entire curve all over again. Thus putting the edges of the curve into an infinite loop of eternity in itself. Fractals exist as complex entities to sight but mathematically they are just simple repeating equations being graphed infinitely. So a change even at the smallest scale can be powerful enough to fuel a change in the entire curve. Finding complex applications in simplicity, the nature, for billions of years has utilized fractals in the formation of galaxies, trees, lungs, and possibly also the way we all think. Prompting us that all the individuals around us could be unique fractals of thought and emotion designed by nature.

Our fest is a fractal too, a fractal of the tech world capable of bringing it in its entirety at our campus. The dynamic nature of technology lets Abhikalpan be the platform where the unique fractals, the natural wonders and the amazing individuals, converge to change the direction of the tech world towards a sustainable future.

Catch-Phrase(best-suited with the theme)
Abhikalpan: The convergence of fractals

Basic explanation:
Abhikalpan...fractal of tech world...so it can bring the entire tech world at our campus, and can affect it directly.
We incorporate the natural fractals...the people ...the traits of nature into technology to create sustainable technology. We thus impact the greater tech world as we're a part of it.(Fractal of it). It's nature based, because of our close proximity with nature(dumna nature reserve).

Theme 2

The theme for this year's Abhikalpan is based on fractals. Geometrically, a fractal is a curve whose each part is capable of representing the entire curve all over again. Thus putting the edges of the curve into an infinite loop of eternity in itself. Fractals exist as complex entities to sight but mathematically they are just simple repeating equations being graphed infinitely. So a change even at the smallest scale can be powerful enough to fuel a change in the entire curve. Our fest is a fractal of the tech world capable of bringing it in its entirety at our campus. Thus the diverse range of events at Abhikalpan provides a platform where one can discover one's whole self through knowledge and thus help make huge meaningful contributions to sustainable technologies.

Catch-phrase(best suited with the theme)
Abhikalpan: Discover your whole, come to be the fractal!

Basic Explanation:

Abhikalpan is a fractal of the tech world, so it is capable of bringing the entire tech world to IIITDMJ. The events at Abhikalpan will help students hone their skills, which will help develop themselves as well as technology around us. As Abhikalpan is a fractal, it can affect technology directly thus letting participants be the part of the greater tech world fractal.
